OBJECTIVE

I am eager to gain more experience and learn new skills in Software Development.

EDUCATIONAL BACKGROUND

February 2009 – July 2017

STUDIED AT:

National University of Asunción; Asunción, Paraguay
Software Engineering

WORK EXPERIENCE

August 2013 – November 2013

Website Developer at PuntoPy Group; Asunción, Paraguay

As part of my required internship for university, worked part-time on website development using HTML/CSS.

July 2015 – December 2015

Junior Java Developer at Bypersoft IT; Fernando de la Mora, Paraguay

I worked full time in development and maintenance of a transactions and stock control software for a big retail company. Responsibilities included software requirements analysis for customers of the company, corrections of existing modules and customer support after product delivery, using tools such as Java EE, JBoss Application Server, AngularJS, JSF for development of REST Web Services.

July 2018 – December 2018

Full Stack Web Developer at National Electricity Administration; Asunción, Paraguay

I worked full-time in development of a Web Application for the pension and retirement fund, I was part of the entire development sides of the application, developing REST back-end using Java technologies, Angular 2 and TypeScript for front-end, and Ionic 2 for Hybrid Mobile app development.

July 2019 – Present

Software Engineer at Oktana Corporation; Asunción, Paraguay

I am currently working full time as a software engineer at this international company, working remotely with teams located in Uruguay, and clients in the United States, developing using technologies like Java Spring Batch, Spring Boot, REST, Salesforce (Apex).
